Turn-Key Connector (TKC)
UKG Pro / Workday HCM Integration

ELJUN LLC
ZEAL | STRENGTH | WISDOM

The UWC solution keeps Workday and UKG Pro in sync with a fully automated, customizable workflow to capture Employee and Contingent Worker data changes such as Hires, Terminations, Re Hires, Rescinds, and other Updates. This build eliminates reliance on Workday delivered change files (PECI/PICOF), giving you full transparency and control of your data flows and business logic. Ultimately, the UWC will save your organization time, reduce cost, and lower risk.

Seamless Integration Between UKG Pro and Workday HCM

UKG ⟷ **Workday HCM**

Privacy and Delivery Method:

Data is accessed using iPaaS technology, allowing Eljun LLC to stream, transform, and write information in memory. Eljun LLC will never put customer data "at rest" unless a customer requests such functionality explicitly.

This solution is accessed via API by paying an annual licensing fee. Eljun LLC ensures uptime and ongoing compatibility with current and future versions of UKG Pro and Workday HCM. Full details are outlined in the UWC Service Level Agreement (SLA) found in the Master Services Agreement (MSA).

This offering is one of many provided by Eljun LLC. To explore additional solutions, visit us at **https://www.eljunllc.com/solutions-overview**
